

PECHI MUTHU

Full Stack Developer

Kovilpatti, Tamil Nadu | pechi8001@gmail.com | +91 76039 57341 | [LinkedIn](#) | [CodeChef](#)

SUMMARY

Final-year B.Tech Information Technology student with hands-on experience building full-stack web applications and AI-integrated developer tools using JavaScript, React, Node.js, and Express.js. Completed two internships and shipped four projects spanning authentication systems, containerized deployments, AI-powered API analysis, and self-healing pipeline observability. Seeking a Full Stack Developer role to apply strong fundamentals in JavaScript, React, and SQL-based backend systems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3, SQL

Frontend: React (Vite), Tailwind CSS, Bootstrap

Databases: PostgreSQL, MySQL, Supabase

DevOps & Tools: Git, GitHub, Docker, Vercel, Render, VS Code, Postman

Core Concepts: OOP, Authentication & Authorization, Database Design, API Contract Diffing

Backend: Node.js, Express.js, RESTful APIs

PROJECTS

API Contract Drift Detector | [GitHub Repository](#)

React, Node.js, Express.js, Supabase, Anthropic Claude API, Vercel

- Built a full-stack tool that compares two OpenAPI spec versions and auto-classifies changes as breaking or non-breaking using a deterministic rule engine across 8+ change types (field rename, endpoint removal, type change, enum change, and more)
- Integrated the Anthropic Claude API post-classification to generate plain-English explanations of flagged drift and AI-drafted migration steps, reducing manual review effort
- Deployed frontend on Vercel and backend on Render with Supabase as the persistence layer; implemented a Monaco-based diff view for side-by-side spec comparison

PipeHeal — Self-Healing Pipeline Monitor | [GitHub Repository](#)

React (Vite), Node.js, Express.js, Docker, Vercel, Render

- Developed a pipeline observability platform that detects CI/CD failures and surfaces automated remediation suggestions to reduce downtime and manual debugging
- Architected a containerized backend with Docker and deployed across Vercel and Render for a resilient, reproducible production environment
- Built a responsive React dashboard with incident timeline, live status indicators, and drill-down views for failed pipeline stages

CollabSpace | [GitHub Repository](#)

React, Node.js, Express.js, PostgreSQL, Docker, Tailwind CSS

- Built a GitHub-inspired developer collaboration platform delivering 3 core modules — workspace management, repository management, and secure authentication
- Implemented containerized backend services with Docker for consistent, reproducible local deployment across environments

EXPERIENCE

Web Development Intern — [Jestech Solutions](#) Mar 2026 – Apr 2026

Madurai

- Built and integrated RESTful API endpoints connecting frontend and backend using Node.js, Express.js, and SQL
- Paired 1:1 with a senior mentor to debug, test, and deploy web application features

Web Development Intern — [Roza Solutions](#) Apr 2025 – Jun 2025

Virudhunagar

- Developed 3 responsive web pages using HTML, CSS, JavaScript, and Bootstrap following modern responsive design standards

EDUCATION

B.Tech, Information Technology — Sethu Institute of Technology 2023 – 2027 | CGPA: 8.0 / 10

XII (Higher Secondary) — Everest Mariappa Nadar Higher Secondary School 2022 – 2023 | 81%

CERTIFICATIONS

- Introduction to Industry 4.0 and Industrial IoT — NPTEL (IIT Kharagpur), Elite | 2026
- Privacy and Security in Online Social Media — NPTEL (IIIT Hyderabad), Elite | 2025
- Programming using Java – Special Batches — Infosys Springboard | 2025
